

File Operations

POSIX file system calls

```
creat(name, mode)
open(name, flags)
close(fd)
link(oldname, newname)
unlink(name)
truncate(name, size)
ftruncate(fd, size)
stat(name, buffer)
fstat(fd, buffer)
```

```
read(fd, buffer, byte_count)
write(fd, buffer, byte_count)
lseek(fd, offset, whence)
chown(name, owner, group)
fchown(fd, owner, group)
chmod(name, mode)
fchmod(fd, mode)
utimes(name, times)
```
