

Why Interrupt?

While a process is reading a disk file, can we do...

```
1  while(!done_reading_a_file())
2  {
3      let_CPU_wait();
4      /* or... */
5      lend_CPU_to_others();
6  }
7  operate_on_the_file();
```
