

```
1  #include<stdio.h>
2  int main(void)
3  {
4      int a = 0, sum = 0, na=0;
5      while (1) {
6          printf("Enter # to add or 0 to stop: \n");
7          scanf("%d", &a);
8
9          if (a==0) break;
10
11         if (a<0) {
12             na++;
13             continue;
14         }
15
16         sum += a;
17         printf("Total: %d\n", sum);
18     }
19     printf("Final total %d ", sum);
20     printf("with %d negative items omitted.\n", na);
21     return 0;
22 }
```
