

cp — With stdio

```
1  #include <stdio.h>
2  #include <stdlib.h>
3
4  int main(int argc, char *argv[])
5  {
6      FILE *in, *out;
7      int c=0;
8
9      if (argc != 3) exit(1);
10
11     in = fopen(argv[1], "r");
12     out = fopen(argv[2], "w");
13
14     while ( (c = fgetc(in)) != EOF )
15         fputc(c, out);
16
17     return 0;
18 }
```

 Try fread()/fwrite() instead.
