

```
1 #include<stdio.h>
2 int main(void)
3 {
4     int a = 0, sum = 0, na=0;
5     while (1) {
6         printf("Enter # to add or 0 to stop: \n");
7         scanf("%d", &a);
8
9         if (a==0) break;
10
11        if (a<0) {
12            na++;
13            continue;
14        }
15
16        sum += a;
17        printf("Total: %d\n", sum);
18    }
19    printf("Final total %d ", sum);
20    printf("with %d negative items omitted.\n", na);
21    return 0;
22 }
```
