```
#include<stdio.h>
₃ int main(void)
       int *p = 5; /* should be (int *)5 */
       printf(" p = p \setminus n", p); /* p = 0x5 */
       printf("\&p = \printf("\&p = \printf("\&p); /* \&p = 0x7ffda48a2068 */
       printf("*p = %c\n", *p); /* Invalid memory access */
        return 0;
10
```
