```c
int main(void)
{
    int *p = 5; /* should be (int *)5 */

    printf(" p = %p\n",  p); /*  p = 0x5 */
    printf("&p = %p\n", &p); /* &p = 0x7ffda48a2068 */
    printf("*p = %c\n", *p); /* Invalid memory access */
    return 0;
}
```
